

Standard Features

4-Digit Extension Dialing - to any other company location or remote user

Advanced Number Management - run several businesses with one operator

Advanced Message Management - store, forward, even email voicemail messages

Anonymous Call Rejection

Automatic Relocation - fingertip access to ALL services with any internet connection

Auto Attendant - with dial-by-name directory & zero-out option - free up your receptionist!

Call Duration Display - manage your time more effectively

Call Forwarding - all calls, busy-no-answer, selective inbound numbers by time/day

Call Logs - caller name and number, date/time, even recordings

Caller ID - number included and name offered for additional charge.

Call Notification - phone, computer/email, or PDA

Call Park - manage one or multiple simultaneous parked calls

Call Screening - with option to send call directly to voicemail

Call Waiting - see caller name and number without interrupting your current call

Call Queing - don't let a prospect get away ("wait for the next available operator")

Click to Dial - from MicroSoft® Outlook™, Apple®, and other contact managers

Conference Calling - unlimited users, add & terminate any or all participants, full duplex

Conference Bridging - multiple callers with number & PIN join at pre-determined time

Data/Time Display - information at a glance

Direct-Inward-Dialing Numbers - every user has their own 10-digit phone number

Directory - immediate on-phone access to missed, received & placed calls, with auto-redial

Do Not Disturb/Interrupt - send calls directly to voicemail during important meetings

Email Integration - be notified of a new voicemail, or have the audio file emailed to you

Event/Client Billing ID/Accounting Codes

Find-Me-Follow-Me - routes callers (that you preselect to ring ANY other phone)

Future-Proof Architecture - new features automatically deployed at no cost

Hold - even handle other calls while callers kept on 'hold'

Hunt Groups - ring one or more phones at the same time - fully customizable

Intercom - to single user, group, or all users at your location via each user's speakerphone

Internet - fixed fireless, Metro Ethernet, T-1, T3, and DSL

Last Number Redial - one-touch button

Low Cost Long-Distance - no long distance limits.

Moves/Adds/Changes & Fees - NONE, EVER!

Music or Message On Hold - wide selection of music, or even custom recordings

Mute/Consultation - allows you to speak without calling party hearing you

Off-Premise Extensions - multiple locations of at-home users?... just like in the next office!

Outlook Integration - plus virtually all major contact management software

Paging System Compatible - works with virtually any existing overhead paging system

Phone Lists - personal AND company-wide directories accessible with a touch of a button

PC Integration - take control of the convergence driving business communication

Instant Phone Re-Assignment - temporary reassign any phone to be used as your own

Recording of All Calls - default or on demand - archive for future use/reference

Redial - last number or any previous number or call made to you

Remote Office - combine any number of users, regardless of geography to 1 virtual office

Remote Phone Management - change setting on the road, directly or on the web

Remote Message Retrieval - access your phone or log-in to your personal web portal

RSS News Feeds - up to the minute deadlines at a glance (user selectable)

Selectable Ringtones - great for shared environments, know when YOUR phone is ringing

Speed Dials - push button access without codes to remember or lists to reference

Speakerphone - every user, every phone, full-duplex conversations

Status Function - see the phone status of all users, busy, do-not-disturb, etc.

Technology-Flexible - never something new to buy - we manage & deliver it to you forever

Toll-Free Number - we'll provide a new one for you, or transfer an existing one

Time of Day Routing - never leave callers guessing if you're closed or away from the office

Transfer - direct/immediate or consult before transferring

Unlimited In/Outbound Lines - NEVER a busy signal

Unlimited Local Calling - expanded geography

User-Configurable Features - like software, select only the features you need

Voicemail Archiving - avoid having to forward through old messages just to save them

Voice Message Transfer - from the phone to other users or via email to anyone, anywhere

Voicemail Notification - (phone/email POA) even send the actual audio file

Web Portal Management - personal and administrative access to manage your phones

What are your current costs?

A simple cost analysis will show the best reason to switch in addition to the included standard features!

INTERNET

estimate more if you're losing money because it's slow, down, or unavailable sometimes

\$

LOCAL LINES

estimate more if you (or worse) your potential customers get a busy signal + calls a competitor

\$

LONG DISTANCE + TOLL FREE

number charges

\$

SYSTEM/PBX Maintenance

(monthly fees, or hourly charges when you make a change, or need repairs)

\$

OPPORTUNITIES LOST

Receptionist could be creating revenue not answering calls that should be placed direct to user or handled with an auto-attendant

\$

Employee could focus on their primary responsibility instead of addressing phone issues.

\$

New customer business resulting from missed calls, poor communication, or less-than-professional call handling.

\$

Time wasted waiting for phone or internet vendor to respond to problems

\$

Your **TOTAL COST** of communication

\$

Get MORE and pay LESS!
